The article is meant as a lure of hibesters, to quiet the Domocratic mai-

For some time past an ill-feeling has existed on the part of the employees of the Cincinnatian Marietis Railroad Company, because of the non-payment of wages due them. On Friday last it reached the point of open rebellion, which resulted in a general strike amongst the engineers, firsman and brakemen, who congregate at Chillicothe, where the workshops are located, and the engines and cars repaired. On that day they took possession of the shops, and locked up every angine in the roundhouse, and as fast as the trains arrived, for a couple of days, they took possession of the engines and cars, and refused to permit them to go out again. The number of engines now heldly the strikers is about fifty, leaving only two with which to operate the road. Of coarse the result was the stopping of all the trains. About two hundred men are engaged in the strike, and at last accounts they held forcible possession of all the property of the Company at Chillicothe.

sides of value we'll banch incore the professional state of the content and th strike, and at last accounts they held foreible possession of all the property of the Company at Chillicothe.

On Friday, Mr. George Barnes, Saperintendent of the road, went to Chillicothe for the purpose of arranging matters with the omproves, but had not been successful when the has intelligence reached the city. The telegraph wires have been down for two or three days, probably being cut off by the strikers. We understand that Noah L. Wilson, Esq., President of the Road, nothled the city authorities of Chillicothe with reference to the spice, that they would be held responsible for the property of the Company, and the authorities were taking measures to put the engines, i.e., again in the possession of the Company.

On Tuesday, a Chizen's Meeting was to be hild of Chillicothe with reference to the subject, but of the result no account has reached as Icaterday, one of the efficient of the Company made an effort to raise a posse here for the purpose of taking them to Chillicothe to all the therif in the service of any process, or making arrests of the leadure in the strike. A train will leave for that city this morning at air effects, with the men, together with what any there are the possession of them.

Great amisement has existed at Chillicothe for service and the progress of affairs.

Caraptan Elections.—The Toronto Globs of Saturday says that fifty-four of the sixty-five Upper Canada constituencies have now been likel up; and of these the Ministry have carried to, the Opposition 32, and the Independent X. Of these 64 seats, 35 were held in the had Parliament by Ministerialists, 19 by Oppositionists, and 2 by Independents. The Oppositionists, and 2 by Independents. The Oppositionists, and 2 by Independents.

March next.

The neminations made this afternoon are as follows:—Sceretary of State—Daniel McClure-Troassare—Aquilla Jones, Auditor—Jno. W. Dodd. Attorney General—E. McDonald. Supt. of Public Instruction—S. J. Rugg. Judges of Supreme Court—S. E. Perkins, J. L. Hanna, and David Warden, All except Messrs. Rugg. Hanna and Warden, are the present incumbents. Resolutions were passed endorsing the present administration. The friends of Douglas are very much dissatisfied and there will probably be another Convention called.

Later from the Utah Army.

St. Louis, Jan. 8.—The Republican has just received letters and papers from Fort Kearney to the 23d ult, stating that Col. Johnson was at Fort Bridger on Nov. 26th.

Col. Cooke, with the whole of his command, had also arrived. Grass was all burned, and the animals were dying at the the rate of 100 per day.

The Mormons were fortifying all the passes leading to the city.

Jose Jones, agent of Majors & Russell, was released and sent to Col. Johnson's camp. In passing through the different canons he was blind-falded, to prevent him obtaining any knowledge of their movements.

Another letter, dated Col. Cooke's command while en route, makes no mention of being molested by the Mormons.

Ruders in Kev York.

New York, Jan. 8.—Two men were murdered in the Fouth Ward last night, by a man named Michael Wagan, Jr., formerly a special deputy sheriff. One, Michael Casey, died almost insendiately, and the other, Edward Kennedy, is not expected to recover. Wagan asserts that the shooting was accidental. His revolver having gone off while engaged in the struggle. Wagan was, it appears, recently convicted of arsen, but through the intervention of influential friends, sentence was suspended. He was brought before Recorder Bassard to day, and held without bail on both offences.

New York Batters,

year. He was assumed to the State Legislature asking for a repeal of the usury laws.

The murderer Donnelly is to be executed at Prochold, New Jersey.

Such is the apprehension of an attempt at rescue, that the jail has been guarded since Tuesday by the military.

Later from Mexico.

New Onixans, Jan, 8.—The schooner Monte Christo, with Tampico dates to the 26th ult, arrived to-day. The news of Commonfort's assumption of the dictatorship reached Tampico on the 20th ult. A proclamation of acceptance was issued the same evening. All is quiet.

A delegation of Seminoles and Creek Indians, accompanied by agents, have reached here on their way to Florida, to induce Billy Howlegs to emigrate West.

Execution of Demosity.

Transfor, Jan. 8.—J. P. Donnelly was hung to-day for the murder of Albert S. Moses. He made a specch two hours and ten minutes long, in which he reviewed the testimony in his case, and repeatedly declared his inbocence. His poeth was able and eloquent. His body was taken to New York. Dr. Cummins, of New York, administered religious rives. A large number of persons were present at the Execution, and very affecting scenes occurred. Everything passed off quietly.

Not True.

Chevitann, Jan. 8.—The statement in the Cincinnati papers of January Sth, of he fall-ure of the Merchant's Branch Bank is untrue.

the sum not in use there is not exaggerated, by what we know to be the case here. In the financial affairs. As soon as navigation opens, and it is found that the ridiculously gross estimates of the association grain in Illino's are the more guess-work of shallow pates, who ought to be supervising the next edition of Mother Goose's Molodies, rather than conducting in go on, less briskly perhaps than a year again go on, less briskly person ago, but in such a way that all parties, except ago, but in such a way that all parties, except

mp, balf a dozen miles from Chicago, may not be worth half a dozen the tice the economy that ought never to have been out of fashlon, will not furnish proper cause of complaint. So far as Chicago is concerned, her merchants must be specially favor the Eastern cities to grant the long credits hereheir customers, and the general disposit ers to buy small assor the business of Chicago should be large. to them the influence of the well-known facts that this is the natural depot for all the proncts of the West, and the count and financial centre of four States, and ther his ought to be a prosperous year. What h

true of them, is true, also, in a greater or les

We used to hear that among the wonders the West," the practice, in times of litt ces and much hog, of burning becomen the ew hours' ride from this city, he found a man surning good sound corn-in-the-ear in his office sart of the surplus must be burned. Before the raf of June, he will wish, not only that he has, is fuel ugain in crib, but that he had taken the

The Gazetic of this city, in the defense of "Ne-For instance a party buye wheat payable in Florence, at, per beside 56 des. It costs, freight to Chicago 15 des. Making it cost at Chicago 76 des. Deduct price at Chicago, 55 des., and it leaves an actual loss on the currency paid of 15 des. Therefore, on every 56 cents paid, there is a loss of 15 cents—the freight from Davemport to Chicago. And on every dollar of Florence there is a loss of 272 des., it being worth just 274 des. less than a dollar of Illinois and Wisconsin. Therefore, in order to convert Florence into Illinois and Wisconsin money to the currence of wheat, it costs 274 are cent. ert Florence into Illinois and Wisconsin money y the purchase of wheat, it coats 27½ per cent. this being the currency paid at Chicago for he grain when it arrives there. Gold is worth it Chicago 45 per cent. To convert Florence ato gold, in a legitimate way, therefore, costs a matter of grace, at 7 per cent, (and this is a rare accommodation) and may be able to pick up a little gold on the streets at from 15 to 20 per cent. share, but when they undertake to convert their Florence in a legitimate way, they cannot realize more than 68 cents on the deliar. This is a fact, and cannot be denied. Go to any grain, or other merchant in this city, with any quantity of Illinois and Wiscomsin currency, and they will make a large difference in price, as between Florence and that. There is nothing to be gained in blinding our cycs to facts. Free discussion will not injure the cause of truth and right. Cook & Sargent have heretofore wielded a strong influence in his section of this State, and particularly in

mander look place in February, 1837. In 1859, he was given command of the twenty gun sloop Levant, then attached to the West India squadrod, under Coumodore Dalias.

Paulding, now a man of over fifty, received his Captain's commission February 29, 1844.
Last st sea in '39, he was now, in 1845, given in command of the twenty-gun sloop Vincenes, which, together with the Celumbus, formed our East India squadron. Returning in April, 1847, he took command, during the following year, of the frigate St. Lawrence, then on her separate cruise to Northern Europe. This was during the Maxican war, in which he took no part. He joined the Mediterranean squadron in '56, under old Com. Morgan. Reharding to New York, he signif sailed to England, carrying out our contributions to the World's Fair.

The next three years were passed in the quites

hand, carrying out our contributions to use world's Fair.

The next three years were passed in the quies command of the Washington Navy Tard. Now came the Retired List, and by its action Captain Paulding was raised on the Naval List from No. 43 to No. 20.

Three years ago be relieved Commodore Newton of the command of the home squadron, with the Potomac for his flag-ship, which command he has ever since retained.

The present squadron under his command is

The present squadron under his command not inconsiderable, consisting of the Wabash

Yesterday morning this long protracte ation was residued, and after some four-hard labor and a dismat succession of mi during which one part after anothe-spparatus broke down in the most ignor aner, the work was discontinued and further occalings postponed rsize die. The ca-ich led to this fifth signal failure may be told the lew words that it was almost impossible led the that when the entries were accounted the signal board showed that the entire k had been moved 38 inches, but of this disce 35 inches were made at one slip carry in day, and with comparatively easy or all a reasonable pressure from the launching paratua. After this, with immense difficulty I at the cost of some parts of the machinery when triffing movement of three inches more

f Mr. Brunel, were an accessarily occasioned at some loss of time was necessarily occasioned a getting such extensive gear into working order, and then at the very commencement it was seen that the versel was sticking fast upor the ways, and that if moved at all, the day work was likely to be a severe one. This with partiy attributed to the Leviathan having g completely off the one foot in 10 inclose in 12, and no doubt the reduced one in 12, and no doubt the reduced gradient must to some extent have exercised a retarding influence. But the real reason, we fear, will be found in the fact that the iron bars of the cradles and the railway metals of the ways are both considerably rusted, and that this resistance, added to the immense, friction always caused by running iron on iron, offers such a bar to the further progress of the vessel as will require half the hydraulic presses in the kingdom to overcome. The first slip was not effected till the pressure applied upon the cradles and the strain from the river exceeded 2,000 tons, and then as we have said, she slipped, or rather

galand apparently more from the vibratory motion communicated throughout her entire length than from her own momentum. From a series of calculations which have been made throughout the tamen, as far as it has yet gone, it has been ascertained that the strain required to keep her in motion when once started was only 100 tons. Yesterday, however, the calculations based on the rapidity with which her momentum dimnished showed that the strain required was more than 250 tons, or one and a half greater than it has been at any time since the efforts first commenced.

After this 35-inch slip, the greatest experience were made to move her, but for a long time without success. During this, all the hydranlic rams were taxed to the very utmost, and thro' the sides of one of ten inches in diameter the water was forced through the pores of the solid iron, like a thin day, until the whole cylinder ripped from top to bottom with a noise like a dail anderground explosion. The iron of this cylinder averaged six inches in thinkness, and

was a mere bagatelle among the other mishaps, which are not only expensive in elves, but by the delays they give rise to, ion an expenditure in which he cost of repair is a more item. No day has yet

So I am told, Sir," said Banks.

antly, as he turned to other topics. At parting Mr. Buchunan took the hand of Mr. Banks and said, "I am happy to have seen you, sir; I wish you well, and I most carnessly wish you success and prosperity in everything but your politics."

two of the sun and two of the moor 1st. A partial college of the moon, Februar 7, only partly visible in the United States, the moon will rise partly colleged, which we ake place generally after the time of the great st phase. Its magnitude will be 0.333 of mo-liameter on the southern limb.

A HUSBAND" COT TO PIECES" BY HIS WIFE t does not seem to satisfy brutality at presen neraly to kill, but there must be an exten ho for to create a sensation. A correspondent the Petersburg (Va.) Express writes from Susounty in that State :

eally which others have sought to overcome, the strain upon the cable irroduced by a risin and failing of the resid. This has done by the use of a compensating weight and reovement so delies that the excess of a single pound by yound any gives weight or strain producement in overcome of the apparatus, and a cures exactly the relief accided. The apparatus, on the content of the frequent of the America Officers of the degrand commany, the works

forthwatern Sugar Grovers' Convention. On Thursday morning, the 7th inst., at ten o'clock, a large number of sugar growers, and the senate chamber of the State House at Springfield. This meeting, it may be well to ear in mind, was held pursuant to a call of Mr. Francis, Secretary of the State Agricultural Society.

and, on motion, Judge J. D. Caton was called to the chair, and Ex-Governor Reynolds and Uriet Mills, Esq., were appointed Vice Presidents. barles Kennicatt were chosen Secretarie After a miscellaneous conversation, in which both ladies and greatlemen participated—for a

was chosen to fill his place.
On motion of Chas. Kennicott, the

of the convention were requested to furnish the Secretaries with their names and addresses The following were reported :

orm of organization for the convention, and

of Tazewell county, Illinois, setting forth his

pheo nown down by the wind. Both this and the implies require a little more care and attention than corn; are longer starting and more delicate, and require more labor in cultivating.

Of the two varieties of cane, I think the Implee will prove the most valuable plants. If planted early and upon good soil with a southern exposure. I think it will ripen before frosts. The past season has been a bad one for a fair experiment. Even our corn is not yet dry enough to grand for bread.

Bauves J. Clax.

responding secretary of the intense state Agr tural Society, for his enthusiastic efforts in col-ing valuable information, and in bringing toge the members of this Convention.

Pursuant to adjournment, the convention as-mbled at 2 o'clock P. M., ex-Governor Reyolds in the chair, and Mr. Mills presiding.

Mr. Reilly moved that the convention adop

STILL GREATER SACRIFIC to the great agricultural class, as it left in doubt the very things which sugar growers most ear nearly desired to know. In other words, it gave o her light on the subject. There was a posno new light on the subject. There was a pos-sibility that some man, now anknown, might invent a new and far better process, in which rollers would be entirely dispensed with. No perfect or faultiess machinery was now known; in truth, the merits and defects of three or four were about equal. In such a case, he hoped that nothing definite would be recommended. The inventive gening of the Northerster. The inventive genius of the Northwestern pe

people at large, would stimulate inventive genius. His motion prevailed.

The report of the agricultural committee was then called for. It embodied the communicathen called for. It embodied the communica-tions given above, and the following awards and opinions:

Your committee would report as follows:—Mr. D. T. Nichols, of Legan County, shows sugar from Chiuses cane, mixed with molasce, having a very gummy appearance, due grained, syrup boiled on the vite of October. Some portions boiled more thoroughly, produced sugar as above stated, after steaming three or four days.

J. H. Smith, of Adams Co., shows a specimen of syrup boiled thick and crystalized almost in a mass; crystals are destitute of rhumbic form under the microscope.

crystals are destitute of rhumbic form under the microscope.

Specimens exhibited by Mr. Pearsons, of Spring deld; eyrup very fair color and flavor; ripe came made in a copper kettle; clarified with milk and eggs; no alkalt used; does not believe it necessary, Second specimen, boiled thick; showed fair crystals after standing six hours. Small specimen clarified with blood, considered rather preferable.

Specimens by A. Henderson, of Jacksonville, Ills; beautifully clear, syrup of fine color, but unpleasant to the taste.

Specimen by Josiah Sawan. Specimen by Josiah Sawyer, Tazewell county fite, clear syrup, rather too dark, and possessing some suppassant flavor.

Specimen by Stephen Stephenson, of Sangamen county; dark color, tolerably clear, and quite un pleasant flavor.

cane.
Three specimens of different consistency, from R
Kimball, of Taze well county; dark color, unplear
aut flavor, but well cleansed.
Sample by D. G. Walker, of Franklin, Morga
county; clear, but too dark, not unpleasant; a fail

ducer unknows.

Specimens of syrup filtered through animal charceal and re-boiled by Mr. Hedges. Taste delicious, superior to anything exhibited—color bright brown, consistency of golden syrup, bearing considerable resemiance to maple syrup.

Specimen manufactured by Col. R. Peters, of Georgia in 1856; greater portion of it crystalized; the molasses mingled with it very bitter, dark and antif for use. the molasses mingred while and the can andit for use. Specimen of syrup made from pith of the can by Mr. Dickenson of Ky., clear as amber; br slightly fermented under the action of the free ac-

Our Entire Stock of Cloaks

At this period Mr. Hedges was called upon for his experience in syrup and sugar making, and in cane raising. He commenced by saying

ductive plant; that is, it would produce more syrup, and a better quality, from the same weight of cane. That raised in Clermont Co., Ohlo, a county which produced white beans and will of a better quality than the product of the world renowned Miami Valley. He produced a letter from an Ohio farmer, who tried an experlment by planting cane on four kinds of rich. On the first, six gallons of juice mad-one gallon of syrup; on the second, seven and a half; on the third, nine; and on the fourth thirteen. The speaker recommended farmers to raise their seed on poor soil, and to plant in rows running north and south, and of irregula width, so as to allow wagons to pass through at convenient intervals. The closest rows This plan also exposed the cane, while growing, to the full effects of both snn and wind. In cutting off, the operator should seize the cane low, so as not to let the butt end touch dirt to adhere to it, and this dirt would remain in the symp or sugar. Frost would not seri-ously injure the cane after cutting; but it would injure the etanding crop. In standing it up in shocks, great care should be taken not to

fier; one pint being enough for a large kettle mend a fine brass sim, with a heavy wire as a rim, and a handle attached. Such an apparatus was far preferable to one made of punched tin, copper or sheet iron. He would recommend litinus paper as a test. When it turned blue, after being dipped into the boiling syrup, the article might be set down as too sour When it broke off short-grained on the edge of a ladle, it was done, and the fires should be imdrowned by water, as that destroys the walls of the furnace; but the bagussa, or pressed cane, ought to be thrown in. It would instanty extinguish the fire, and at the same time be ome so dry as to answer for kindling when operations were renewed. All surplus bagasseshould be used as manure, as it was a most ex eclient composition. In cutting off the seed heads, about afteen inches of the top of the stalk, or thirty inches id all, should be taken The report of the Agricultural Com pinted to fill the office. Mr. Medill then offer

pointed to fill the considered and the two Vice Resolved, That the President and the two Vice Presidents of this convention be empowered to any time, when, in their indrement, such action ms are necessary, appoint a committee of in necessary, appoint a committee of in the committee of
